Compliant Grow Through Tiles are an environmentally friendly rubber non-slip, impact absorbing safer surface for play areas and footpaths. Ideal for use in conjunction with our Timber Fitness & Trim Trails, it can also be installed under most play units, springers etc and on pathways for use as a grass reinforcement tile.

We offer **Compliant Grow Through Tiles** on a both a supply only basis, complete with all necessary fixing pins and ties, and on a full supply and install basis. For DIY installation they require no special training, skills or tools allowing a quick and easy installation onto existing level grass sites.

Compliant Grow Through Tiles are tested to offer a Head Impact Criteria in excess of 3.0m on a good well maintained and stable grass, on the right site and ground conditions.

Compliant Grow Through Tiles require no special baseworks, and so are a low cost option for green field sites. In addition to the tiles we offer **Compliant Grow Through** Ground Stabilising Mesh, a tough, long lasting load spreading extruded plastic geo-net grid designed to permanently reinforce grassed areas. It can be used in isolation or beneath **Compliant Grow Through Tiles**, particularly on softer ground or where heavy loads such as vehicles are anticipated. Grass intertwines with and grows through the mesh and tiles, leaving a natural appearance.

Please always check and consider the suitability of this product prior to installation as the Head Impact Criteria will be affected by the grass condition, soil type, moisture, maintenance, etc.
